## UNIDIRECTIONAL DRAINING DEVICE

## ABSTRACT OF THE DISCLOSURE

- A draining device including a threaded portion, the threaded portion depending outwardly from an annular portion and having an inner opening in fluid communication with a pair of openings in the annular portion, where said pair of openings provides a pathway for draining.

1. A draining device comprising:  
 (a) an annular portion;  
 (b) a threaded portion depending outwardly from the annular portion;  
 (c) an inner opening in the threaded portion;  
 (d) a pair of openings in the annular portion;  
 (e) a pathway for draining from the inner opening through the pair of openings.
